

DELHI PUBLIC SCHOOL BANGALORE NORTH

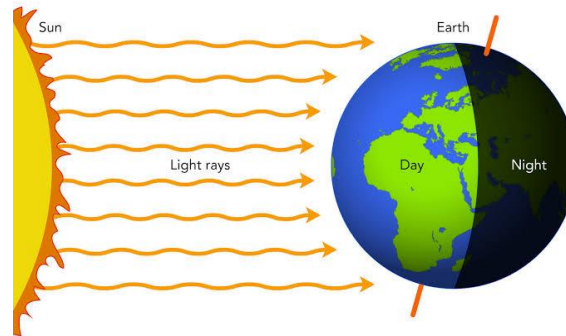

GRADE: V SUBJECT: SOCIAL STUDIES

LESSON – 4 MOVEMENTS OF THE EARTH

QUESTION BANK

Note: Write the questions and headings in black pen and answers with a blue pen. Draw a line using red/black pencil after the answer.

I. Creative page- Draw a diagram showing the formation of day and night due to rotation of the Earth.

II. KEY WORDS: (to be written twice)

1. equinox
2. tides
3. rotation
4. revolution
5. orbit
6. leap year
7. hemisphere
8. solstice
9. seasons
10. movements

III. DEFINE:

1. Leap year- Our calendar consists of only 365 days. One-quarter ($\frac{1}{4}$) day gets only left and this is the reason every fourth year is consists of 366 days and are called as a leap year.

2. Equinox- a) **Twice in a year the Sun is directly overhead the Equator. This is called equinox.**
b) **During equinox the entire Earth has equal length of day and night.**

IV. ANSWER THE FOLLOWING:

Q1- Explain the two motions of the Earth, rotation and revolution.

Q2- What do you understand by summer and winter solstices?

Q3- What role does the tilt of the Earth's axis play in causing seasons?

Q4- Draw a flow chart to show the two movements of the Earth. (To be done on the blank page. Use a pencil to draw and write in the flow chart).
